Step 1 — Back Panel

- Turn off the computer.

- Disconnect the charging cable from the computer.

  ⚠️ Failure to turn off the device and disconnect the cable could lead to personal injury or device damage.

- Flip the computer upside down.

Step 2

- Remove the captive screw located on the top section of the back panel, using a Philips #1 screwdriver.

  ℹ️ Keep in mind that the screw cannot be fully removed from the panel, even when fully loosened.
Step 3

- Use the blue, plastic opening tool to gently pry a section of the back panel open.

- Next slide the opening tool around the back panel to disconnect the clips holding the panel in place.

- After the clips have been disconnected, the back panel can then be easily lifted off the computer.
Step 4 — SSD

- Locate the SSD, it is located in the center on the far left.

Step 5

● Unscrew the 3mm Philips #1 screw that is holding the SSD in place.

Step 6

● Gently pull out the SSD, horizontally along the computer to remove it.

To reassemble your device, follow these instructions in reverse order.
