INTRODUCTION

This guide explains one potential fix for the common problem of SIM Card Reader issues with the LG G3 smartphone.

✎ TOOLS:

- JIS #0 Screwdriver (1)

Step 1 — Fix LG G3 "SIM Card Removed" or "Service Disabled" issue

- My LG G3 had "Service Disabled" and "SIM Card Removed" come up more and more.

- First power off, remove the back cover and place the screen on a stable surface.

- Use J0 or similar Phillips driver, REALLY tighten all 13 screws, using downward pressure to keep the drive in place. But be careful not to damage any part.

- Then put the battery, the SIM and the back cover back, and power on. Good luck!

To reassemble your device, follow these instructions in reverse order.
