

# Huawei P10 Rear Camera Replacement

Use this guide to replace the rear camera in...

Written By: Dominik Schnabelrauch

# INTRODUCTION

Use this guide to replace the rear camera in your Huawei P10 smartphone. When reassembling your phone apply new adhesive where it is necessary.

## TOOLS:

[P2 Pentalobe Screwdriver iPhone](#) (1)

[Spudger](#) (1)

[iFixit Opening Tool](#) (1)

[Tweezers](#) (1)

## Step 1 — Back Cover

- Switch off your phone.
- Remove the two Pentalobe P2 screws at the bottom.
- Remove the SIM card tray.

## Step 2

- Insert a plastic opening tool between the display and the case starting at the bottom area of your phone.
- Carefully pry the display with its parts out of the case.
  - ⓘ Getting the prying tool in will require some effort, be careful not to slide the tool too much or you might slightly damage the housing.
- After you pried out the bottom end, use the opening tool to open the clamps on both sides.

### Step 3

⚠ Don't open the phone all the way, yet. The cable for the standby and volume buttons is still connected to the back cover.

- Swing open the phone backwards.
- Use a spudger to disconnect the power- and volume button flex cable.

### Step 4 — Battery disconnect

- Remove the Phillips #00 screw.
- Use [tweezers](#) to remove the metal plate.
- Use a spudger to disconnect the battery flex cable.

## Step 5 — Rear Camera

- Remove the Phillips #00 screw.
- Use [tweezers](#) to remove the metal shield.

## Step 6

- Use tweezers to loosen the bottom end of the adhesive strip, that holds down the flex connector of the rear facing camera.
- Use the flat end of a spudger to disconnect the camera flex cable.
- Carefully remove the rear camera.

To reassemble your device, follow these instructions in reverse order. When reassembling your phone apply new adhesive where it is necessary.
