

Hoover T-Series WindTunnel Pet UH30310 Inlet Filter Replacement

This guide will help you into replacing the inlet filter in the body of the vacuum.

Written By: Nathan Yung

INTRODUCTION

This guide will help you into replacing the inlet filter in the body of the vacuum.

TOOLS:

- [Fingers](#) (1)
-

Step 1 — Inlet Filter

- Remove the frame of the vacuum by pinching the tab down and pulling the frame away from the vacuum body.

Step 2

- Locate the large sieve at the bottom of the vacuum body.
- Lift off the sieve, separating it from the filter.

Step 3

- Remove the old inlet filter from the vacuum body and replace with the new filter.

To reassemble your device, follow these instructions in reverse order.
