How to Update a Dell Laptop Display Driv...

# INTRODUCTION

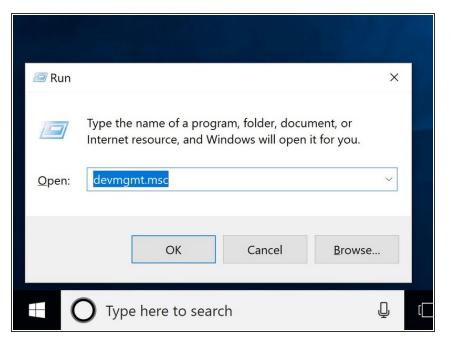

This shows how to update the display drivers for your Dell laptop.

# Step 1 — How to Update a Dell Laptop Display Driver

 To start you will want to hit the Windows key and the R key at the same time to pull up the Run Window.

#### Step 2

 In the run window type "devmgmt.msc", and hit the OK button.

		I System devices		
		Universi Serial Riic controllere		

• The name of the display adapter may be different from the one on my computer. For this step we want the item that is in the spot that I have highlighted blue in the picture. Right click on it, and from the menu that appears click on the option that says "Update Driver". It should be the top option on the list.

 You should see a window that looks like this pop up. Click on the option that says "Browse my computer for driver software".

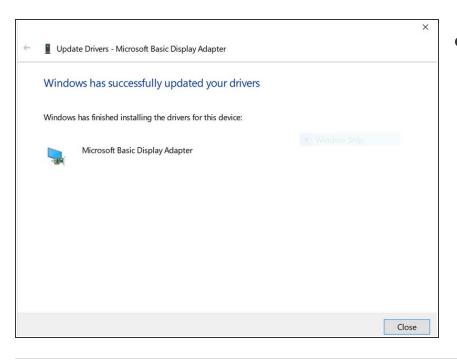

# Step 6

4	Update Drivers - Intel(R) HD Graphics 520	×
	Browse for drivers on your computer	
	Search for drivers in this location:	
	C\Users\Work\Documents	
	☑ Include subfolders	
	→ Let me pick from a list of available drivers on my computer This list will show available drivers compatible with the device, and all drivers in the same category as the device.	
	Next C	ancel

 The next step will look like this. Click on the option near the bottom that says "Let me pick from a list of available drivers on my computer"

		×
~	Update Drivers - Intel(R) HD Graphics 520	
	Select the device driver you want to install for this hardware.	
	Select the manufacturer and model of your hardware device and then click Next. If you have a disk that contains the driver you want to install, click Have Disk.	
	Show compatible hardware	_
	Model Image: Microsoft Basic Display Adapter	
	This driver is digitally signed. Have Disk	
	Tell me why driver signing is important	
	Next Cance	

- The names of the items in this list may be different for your computer. If you have one named "Microsoft Basic Display Adapter" then select that one and hit next. If that one is not in the list then pick the one with the oldest date in the name.
- Once you follow the instructions on the next step your computer's screen may go black for a moment. This is normal part of the update process, and nothing to worry about.

 Once it is done updating you should see this screen, and the software will be up to date and you should not see the colored and white lines on your computer screen anymore.
