# Alienware P18G M14X R1 RAM Replacement

How to replace the RAM sticks in the Alienware P18G M14X R1.

Written By: Andonaq Grozdani

INTRODUCTION

In order to remove the RAM you first need to remove the battery.

⚙ TOOLS:

- Phillips #1 Screwdriver (1)

Step 1 — Back Cover

- Loosen the top left and top right 6.5mm PH1 screws that hold down the back cover.

- ⓘ The screws will not be able to be removed from the back cover. They can only be loosened or tightened.
Step 2

- Slide back cover forward using your thumbs.

Step 3

- Lift up the cover and set aside exposing the internals of the computer.

Step 4 — RAM

- Unscrew the two 6.35 mm using the PH1 screw driver.

Step 5

- Lift the plate and remove it to uncover the RAM sticks.

Step 6

- Push outward on the prongs that secure the RAM stick in the slots.

- (i) After releasing the prongs the rams stick will rise up.
