Step 1 — Battery

- Unclip the two latches on the bottom of the laptop.

- Slide the battery straight out while holding the clip open.
Step 2 — Disc Drive

- Using the Phillips #0 screwdriver, remove the 7.5mm screw from the underside of the plastic frame that holds the disc tray in place.

Step 3

- Remove the disk tray assembly by sliding it out from the side using the blue plastic opening tool.

Step 4 — Back Panel

- Remove all of the remaining back panel screws with a #0 Phillips head screwdriver.

- ⓘ Remember to remove the two screws under the rubber feet.

Step 5

- Carefully use the blue plastic opening tool to pry the clam shell of the laptop apart.
- ⓘ You may need to flip the laptop over to unlatch all of the internal clips.

Step 6

- Carefully pull the shell of the computer apart.

Step 7 — RAM

- Using a plastic spudger, unclip the latch locking the RAM to the motherboard.

Step 8

- Gently tilt the RAM sticks up and slide out each stick.

To reassemble your device, follow these instructions in reverse order.
