Lenovo G40-30 LCD Screen Replacement

How to replace the LCD screen in a Lenovo G40-30.

Written By: Jimmy McClenan

INTRODUCTION

Replacing the screen is a quick and easy task. Removing the screen only takes three tools: A JIS #0 screwdriver, a plastic opening tool, and a spudger. Before you start make sure you remove the battery and unplug the device.

TOOLS:

- iFixit Opening Tools (1)
- Spudger (1)
- JIS #1 (1)

Step 1 — Battery

- At the top of the laptop you will see two switches, like in image one and two.

- Pull the switches outwards with your thumb, towards the unlocked lock.

Step 2

- Once both switches are pulled, the battery should pop out.

Step 3

- Now you are ready to insert your new battery.

Step 4 — LCD Screen

- Use the plastic opening tool to pry the plastic away from the screen.

Step 5

- Carefully unsnap the front plastic piece to expose the frame of the screen.

Step 6

- Unscrew the four 7mm screws located on all four corners of the frame using a JIS #0 screwdriver.

⚠ Carefully lift the screen from the base so as to not damage it.

Step 7

- Slowly remove the sticker connected to the rear of the screen using a spudger.

⚠️ Carefully disconnect the screen from the base of the laptop.

Step 8

- Now you have removed the screen and are ready to install a new one.

To reassemble your device, follow these instructions in reverse order.
