

# Samsung Galaxy S7 Active Screen Replacement

How to replace a Samsung Galaxy S7 Active screen.

Written By: Erick Vazquez

## INTRODUCTION

This guide will teach you how to pry open your screen through the front side of the phone.

### TOOLS:

- [Metal Spudger](#) (1)
- [Tweezers](#) (1)
- [Heat Gun](#) (1)

### PARTS:

- [Samsung Galaxy S7 Active Screen](#) (1)

## Step 1 — Samsung Galaxy S7 Active Disassembly

- Melt the adhesive on the screen by applying a blow dryer directly on the screen.

**⚠** Your phone is hot, please do not touch it with your bare hand.

## Step 2

- Wedge the metal spudger in between the screen and the frame to begin separating them.
- ⓘ It would be easier to separate the screen from the sealing adhesive on the frame if you with more than one metal spudger.
- ⓘ Your phone might no longer be watertight after you reassemble it.

### Step 3

- Slide the metal spudger around the phone at least once.
- ⓘ It would be easier to slide your metal spudger if you apply the blow dryer to where you are currently sliding.

### Step 4

- Lift the screen up with your hands.
- ⚠ Please wash your hands thoroughly with hot water and soap after you finish.

## Step 5 — Screen

- Use the tweezers to disconnect the screen from the phone by detaching the connection.

## Step 6

- Clean the rest of the adhesive left on the phone by scraping it off with a metal tool.
- Apply rubbing alcohol on the adhesive to make sure phone is free of any adhesive. Do this by applying some rubbing alcohol onto a napkin.
- Lightly proceed to clean the phone with that napkin.

To reassemble your device, follow these instructions in reverse order.
