# Thermaltake Theron Plus 5-pin USB Cord Replacement

If by troubleshooting you have determined that...

Written By: Grace Neville

INTRODUCTION

If by troubleshooting you have determined that your USB cord is defective, you will need to replace it. This guide will demonstrate how to replace a faulty USB cord.
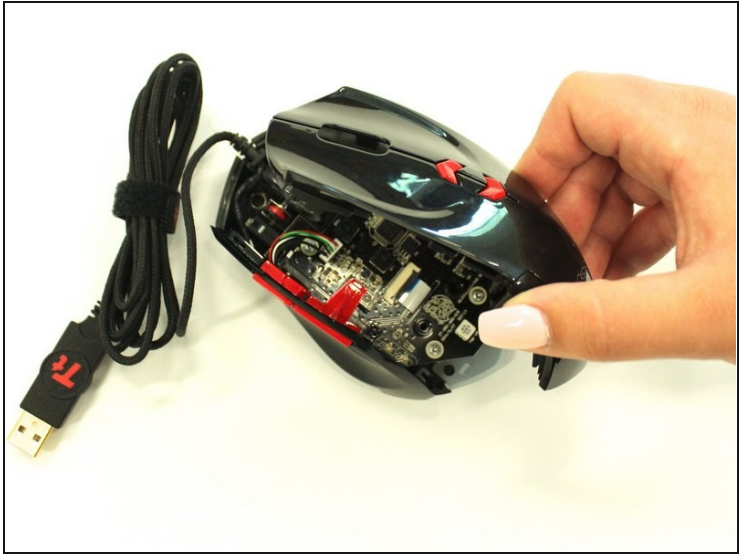

TOOLS:

Tweezers (1)

PARTS:

Replacement cable 5 pins (MagSafe) (1)

Step 1 — Top cover

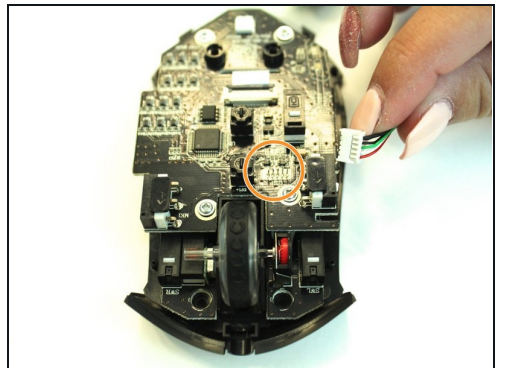

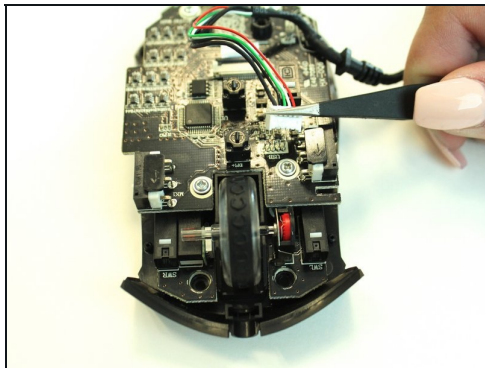

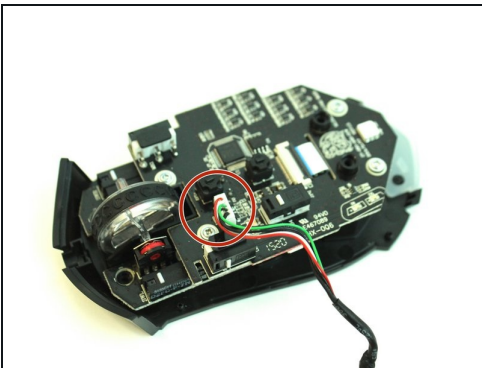

- Remove the plastic cover and pack of weights.

- Remove the two 1.0 mm foam covers with tweezers.

- Peel away the plastic screw cover with tweezers.

Step 2

- Remove the four 1.0 mm screws with a Ph #1 screwdriver.

- Gently remove the top of the mouse.

Step 3 — 5-pin USB Cord

- Locate the 5-pin connector on the mouse's motherboard.

- Use the [tweezers](#) to carefully pull the 5-pin connector off. Do this by grasping the connector and wiggling it back and forth until it is off.

- Once removed, place new 5-pin connector on in the same way.

To reassemble your device, follow these instructions in reverse order.
