

# Samsung Galaxy S III Headphone Jack/Speaker Assembly Replacement

Replace the Headphone Jack/Speaker Assembly in your Samsung Galaxy S III.

Written By: Walter Galan

# INTRODUCTION

Use this guide to replace the headphone jack/speaker assembly.

## TOOLS:

- [iFixit Opening Tool](#) (1)
- [Phillips #00 Screwdriver](#) (1)

## PARTS:

- [Galaxy S III Headphone Jack and Speaker Assembly](#) (1)

## Step 1 — Rear Case

- i** The following four steps can be accomplished without a plastic opening tool. However, it's recommended to use a tool to best avoid breaking any clips along the perimeter of the rear case.
- Insert a plastic opening tool or fingernail into the notch in the gap between the rear case and the rest of the phone, located at the top of the device.
  - Gently twist the opening tool to disconnect the clips securing the top of the rear case.

## Step 2

- Slide the plastic opening tool left along the top edge and repeat the twisting motion to widen the gap between the rear case and the phone.

## Step 3

- Continue to move the plastic opening tool around the perimeter of the top left corner, gently prying up along the rear case.

## Step 4

- Pry along the top right side, and continue prying down the right side of the rear case.

## Step 5

- Lift up and remove the rear case from the phone.
- i** You may need to peel the case up to separate it from any clips still holding it to the bottom of the phone.

## Step 6 — Battery

 This step can be accomplished without the need of a plastic opening tool. Just use your finger if you want to.

- Wedge a plastic opening tool into the small notch above the battery.
- Pry the battery up out of its recess.

## Step 7

- Remove the battery.

## Step 8 — SIM Card

- Using your fingernail, push the SIM card slightly deeper into its slot, until you hear a click.
  - After the click, release the card and it will pop out of its slot.
- ☒ For reassembly, push the SIM card into the slot until it clicks in place.

## Step 9

- Use your thumb to slide enough of the SIM card out of its slot to grab ahold of it.
- Grasp and remove the SIM card away from the phone.

## Step 10 — microSD Card

- Using your fingernail, push the microSD card slightly deeper into its slot, until you hear a click.
  - After the click, release the card and it will pop out of its slot.
- ✦ For reassembly, push the microSD card into the slot until it clicks in place.

## Step 11

- Use your thumb to slide the microSD card out of the slot.
- Remove the microSD card from the phone.

## Step 12 — Plastic Midframe

- Remove the ten 4.0 mm Phillips screws securing the midframe to the front panel assembly.

## Step 13

- Grasp the left side of the plastic midframe with your thumb and forefinger and lift it away from the phone.
- ⓘ The midframe lightly snaps in place, and can be removed with very little force.

## Step 14 — Headphone Jack/Speaker Assembly

- Use a plastic opening tool to pry the rear-facing camera connector up from its socket on the motherboard.

**⚠** Make sure you are prying on the connector and not the socket, or you may damage the motherboard.

## Step 15

- Insert a plastic opening tool outboard of the speaker portion of the headphone jack/speaker assembly.
- Gently pry the headphone jack/speaker assembly up from the front assembly.

## Step 16

- Lift the headphone jack/speaker assembly out of the Galaxy S III.

To reassemble your device, follow these instructions in reverse order.
