

BlackBerry Pearl Flip 8220 Battery

This guide shows how to remove the battery for the Blackberry Pearl.

Written By: Ashley

INTRODUCTION

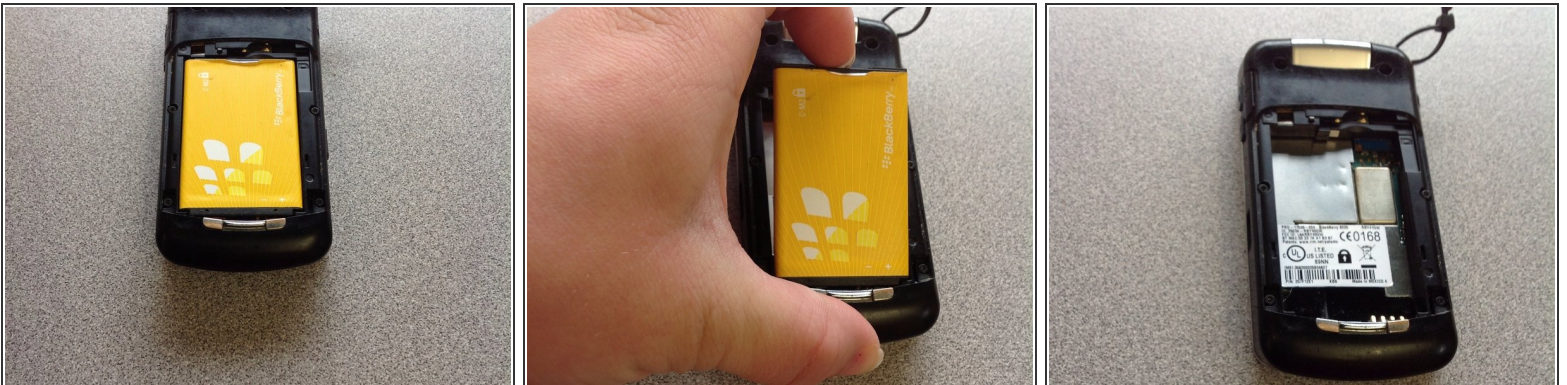

Looking at the battery of your phone can help solve a multitude of problems. By removing the back of your phone you can access the battery to your BlackBerry Pearl.

Step 1 — Battery

- Flip the phone over to the back.
- Pull down on the small silver button at the bottom of the phone.
- The back of the phone will pop open.
- Remove the back of the phone.

Step 2

- You will then be looking at the battery.
- To remove the battery, pull down on the top of the battery and pull it toward yourself.

Step 3

- To check for water damage look at the bottom of the phone battery.
- In this image, the orange rectangle indicates water damage.
- If the rectangle is white, there is no water damage.

To reassemble your device, follow these instructions in reverse order.
