Step 3 — Keyboard

- Press gently at the points indicated to release the LED cover strip.

- Turn the laptop over, then lift the LED cover.

- Remove the LED cover.

Step 4

- The five screws that anchor the keyboard are now visible.

- Start by removing the first screw.

- Remove the remaining screws (2-5).

Step 5

- Dismount the keyboard from the chassis.

- Flip the keyboard forward, taking care as it is still connected by a cable to the motherboard.

- Release the cable latch on the right side of the motherboard connector with a small flat blade screwdriver.

Step 6

- Release the cable latch on the left side of the motherboard connector.

- Slide the cable straight out from its connector.

- Remove the keyboard.

To reassemble your device, follow these instructions in reverse order.
