

# Toshiba NB100 Keyboard Replacement

Solve non-working keys.

Written By: Simeon Brankov

# INTRODUCTION

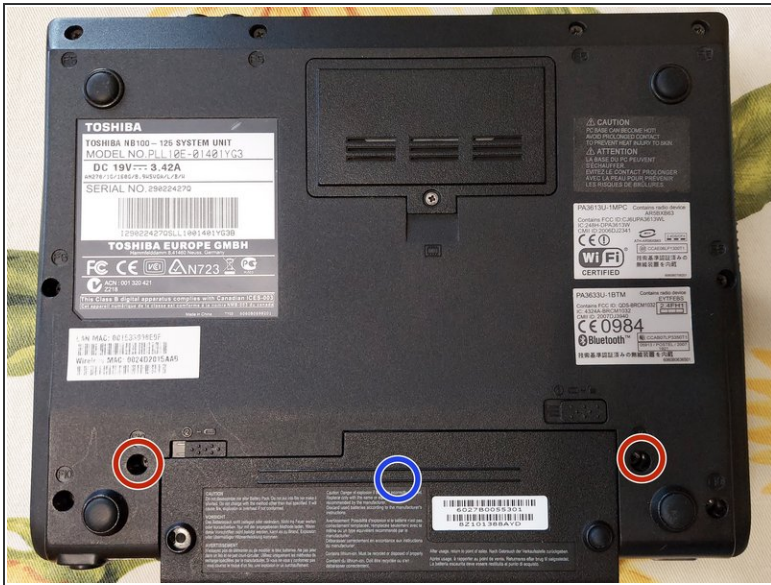

Hello, in this simple guide I'll be showing you how to replace the keyboard of Toshiba NB100 laptop.

## TOOLS:

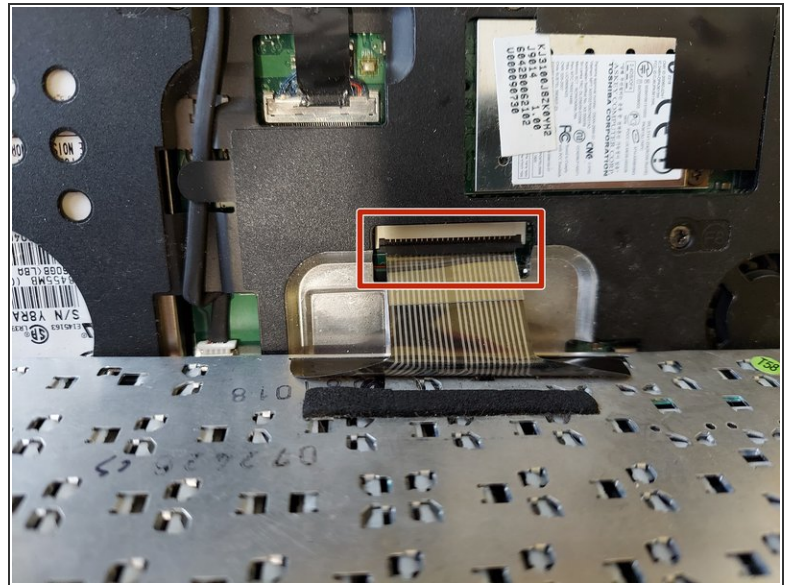

- [Phillips #00 Screwdriver](#) (1)
  - [Spudger](#) (1)
-

## Step 1 — Getting to the keyboard

- Remove the 3 screws holding the panel above the keyboard. The third one should be below the battery, so remove it as well
- Use a spudger to pop the panel and remove it.

## Step 2 — Removing the old keyboard

- Remove the 2 screws holding the keyboard in place.
- Carefully lift the keyboard and gently disconnect the cable.
- That's it. Remove the old keyboard and replace it with the new one.

To reassemble your device, follow these instructions in reverse order.
