

# Asus VivoBook X540N HDD to SSD Replacement

Written By: Simeon Brankov

## TOOLS:

- [Phillips #00 Screwdriver](#) (1)
- [Spudger](#) (1)

## PARTS:

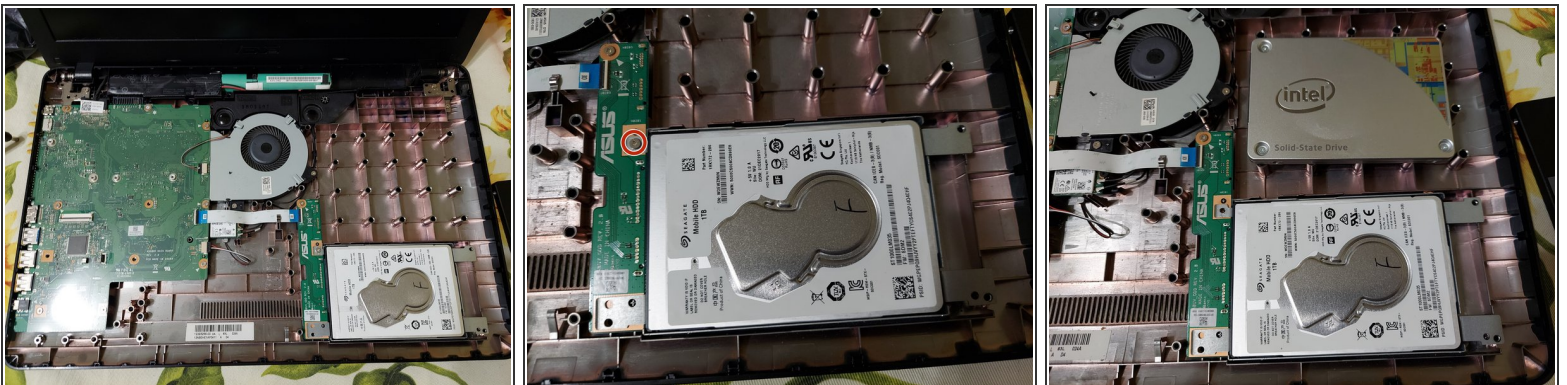

- [1 TB SSD](#) (1)
- [250 GB SSD](#) (1)
- [500 GB SSD](#) (1)
- [2 TB SSD](#) (1)

## Step 1 — Opening the laptop

- First of all you need to remove the 10 screws holding the laptop together.
- Then use plastic or metal spudger to separate the bottom cover from the keyboard and touchpad assembly.
- Once you open it, carefully unplug the keyboard and touchpad connectors. Be very careful not to damage them!

## Step 2

- Once you open it, it should look like this.
- You need to unscrew the only screw (marked in red) to be able to remove the HDD.
- When you do that, just unscrew the 4 screws attaching the HDD to the bracket and replace it with the new one.

To reassemble your device, follow these instructions in reverse order.
