## Step 1 — Starlink Round Dish Teardown

- While lacking a lot of the same weather protection that is in the rectangular dish, the circular dish has a lot of the same technology. Underneath the hood you'll see:
  - IEEE 802.11a/b/g/n/ac standard
  - Dual band 2.4GHz and 5GHz
  - 2x2, MU-MIMO
  - WPA2 and WPA3 security
  - Operating Temperature: +32°F to +86°F (0°C to +30°C)
  - One Ethernet port
  - Power Input of 100-240 VAC 50/60 Hz, 2.5A Max
