Step 1 — Back Panel

- Turn the laptop over and remove the ten Torx T5 screws along the perimeter of the bottom panel using the T5 Torx Screwdriver.

- Remove the back panel from the device exposing the components.

Step 2 — Battery
- Remove the four 3 mm Phillips #0 screws holding the battery in place.

This document was generated on 2023-01-08 06:22:08 PM (MST).
Step 3

- Disconnect the battery cable from its motherboard socket by gently pulling it towards the battery. The spudger tool may be needed to lift the flap seal.
  - ⚠ Pull parallel to the battery, not straight up.
  - ⓘ Pull evenly on the width of the cable so that no individual wire is overly strained.
- Lift the battery out.

Step 4 — Wi-Fi Card

- Remove the single 1 mm screw at left of Wi-Fi card with a Phillips #0 screwdriver.

This document was generated on 2023-01-08 06:22:08 PM (MST).

Step 5
- Pull the Wi-Fi card out of the slot on the motherboard.

- (i) It is still connected to the coaxial cables so don't yank it out or those connections will break.

Step 6

- Detach the white wire that is connected to the Wi-Fi card by applying gentle pressure.

- Detach the black wire by applying gentle pressure.

To reassemble your device, follow these instructions in reverse order.
