

# Disassembling Planet Eclipse Geo3 Body

Separating the two halves of the body.

Written By: Rett Triplett

---

## INTRODUCTION

This guide will show you how to separate the body into the trigger frame and the bolt frame. This will allow you to access the solenoid and eyes.

### TOOLS:

- [Macro Bit Set](#) (1)
- 5/64" Allen Wrench, 1/8" Allen Wrench
-

## Step 1 — Grip

- Remove the four screws from the grip with the 5/64" allen wrench. There are two on each side.

## Step 2

- Pull the grip away from the frame.

## Step 3

- Pull the grip through the opening.
- The grip is connected in the middle and is one piece.

## Step 4 — Macroline

- Remove the macroline from the fitting by pulling the metal ring around the end of the fitting away while pulling out the macroline.
- ⓘ It helps to rotate the collar to create room to pull out macroline.*

## Step 5

- While pulling in the metal ring on the fitting, pull the macroline out.

## Step 6 — Body

- Use 1/8" allen wrench to remove screw behind regulator.

## Step 7

- Use 1/8" allen wrench to loosen the screw inside the grip on the right side.
    - ⓘ *The screw only needs to be turned a couple of times.*
  - Slide the upper frame forward on the rails and remove the screw from the slot to separate the two halves of the body.
- ⚠ BE CAREFUL: Do not pull the two frames apart too much or too quickly. This may cause the wires to be damaged.**

To reassemble your device, follow these instructions in reverse order.
