

LG CU515 SKU 64743 Device Phone Screen Replacement

This guide explains how to remove the front...

Written By: Maggie

INTRODUCTION

This guide explains how to remove the front plastic screen covering from the phone. This is a fairly simple guide for the LG CU515 SKU 64743 Device. Removing the front screen covering will require only a plastic pry tool. This guide will take you through each step in detail so as to make the process as easy as possible.

TOOLS:

[Pry Bar](#) (1)

Step 1 — Front Screen Covering

- Carefully pry around the crevice of the entire plastic screen covering using a pry bar or some other type of sharp tool.
⚠ Be careful when prying as the plastic covering can easily be bent or cracked.
 - Once you have pried all the way around, using [tweezers](#) to pull the plastic screen completely off.
-

To reassemble your device, follow these instructions in reverse order.
