

HP Pavilion dv6000 Speaker Bar Replacement

This is a simple way to replace the speaker bar located under the metal cover at the top of the keyboard.

Written By: Joba Fett

 **TOOLS:**

- [Phillips #0 Screwdriver](#) (1)
-

Step 1 — Speaker Bar

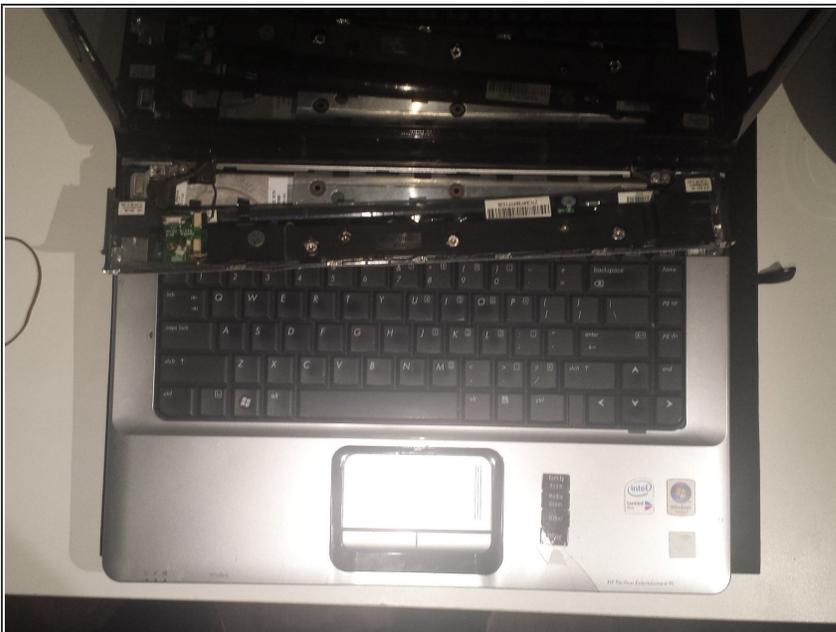

- Make sure the laptop lid is closed, turn it over and remove the battery by moving the switch right to left.
- there are three philips screws located on the surface where the writing is. remove those three screws.

Step 2

- turn the laptop right side up. Between the cover and case on the top right of the laptop and using a plastic sludger or a finger lift gently on the speaker cover as to disengage the clips.
- Be sure not to pull hard or you may damage the ribbon cables.
- From the side closest to the screen turn the cover towards yourself.

Step 3

- there is one connector from the speaker bar to a control board. Gently remove the cable.
- There are two more screws attaching the speaker bar to the cover, remove these and take the speaker bar out.

Step 4

- you are now ready to replace or repair the speaker bar. I recomend purchasing a new one, they range anywhere from 5-15 dollars online.

To reassemble your device, follow these instructions in reverse order.
