

Motorola Droid Battery Replacement

Give your old Droid a battery life boost by replacing the battery.

Written By: Matthew Newsom

INTRODUCTION

Give your old Droid a battery life boost by replacing the battery.

Step 1 — Battery

- Slide the battery cover downwards while applying pressure to the center of the battery cover with your thumb.
- Lift and remove the battery cover out from the phone.

Step 2

 Grasp the upper left corner of the battery and lift it out of its housing.

To reassemble your device, follow these instructions in reverse order.
