Opening the Mac Pro First Generation Case

Prerequisite Only
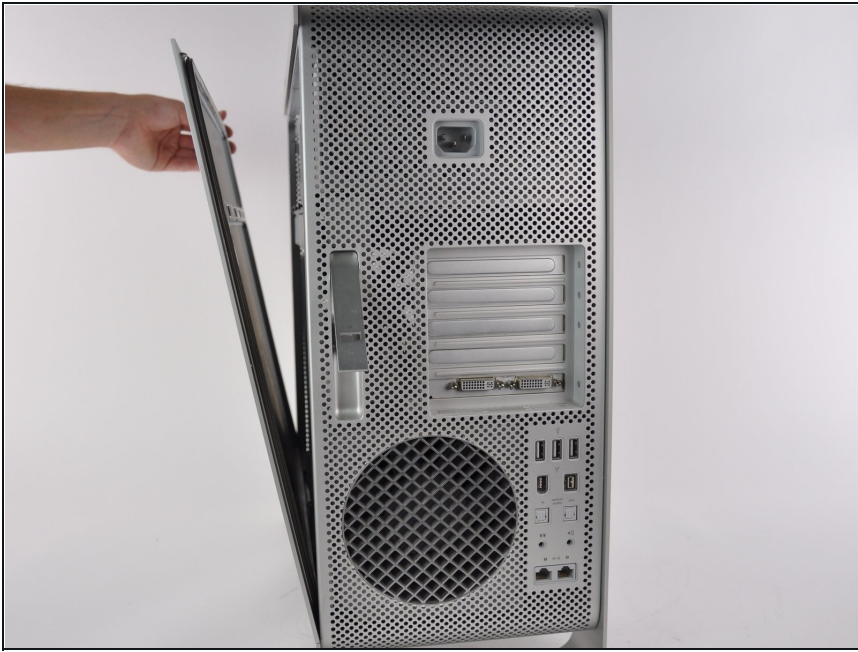

Written By: Andrew Kim

INTRODUCTION

Prerequisite Only

Step 1 — Case Panel

- Lift the lever to unlock the case.

Step 2

- Remove the side panel of the Mac Pro.

⚠ Discharge any static electricity by touching a grounded surface prior to working on any internal components. Touching the metal PCI slot covers works great, or any other grounded metal surface. You can also wear a [anti-static wrist strap](#).

To reassemble your device, follow these instructions in reverse order.
