Step 3 — Remove Back Cover

- Gently slide the backside phone cover off exposing the battery underneath.

Step 4 — Lift Battery

- Carefully lift the battery up from where the spudger is pointed.

Step 5 — Remove Battery

● Remove the battery from its dock.

Step 6 — Slide SIM Card Out

● Slide the SIM Card out of its dock.

## Step 7 — Remove Phone Screws

- Use a Phillips screwdriver to remove the four 2mm Phillips #000 screws from each corner of the device.

Step 8 — Remove Phone Casing

- Rotate the phone so the base is facing you.

- Use spudger to separate phone casing and inside as shown.

- Remove the casing carefully and set aside.

Step 9 — Remove Camera Screws

- Place phone with exposed motherboard facing you.

- Use a PH000 driver to remove the five 2 mm screws holding the camera in place.

Step 10 — Remove Motherboard

- Carefully lift up to motherboard to expose the power button.
