INTRODUCTION

The printer will stop printing and will display an alarm light. A paper jam warning will be displayed on the computer.
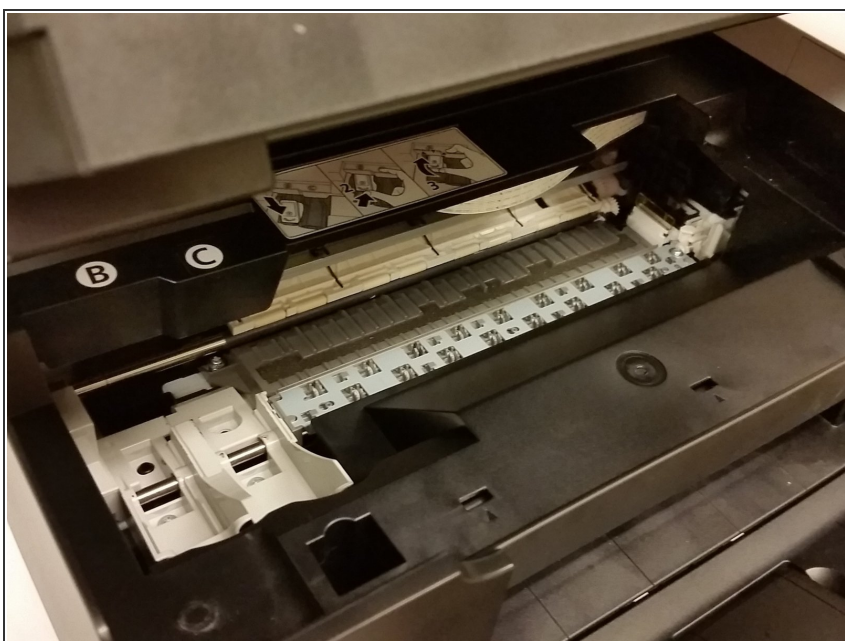

Step 1 — Locate Paper Jam

- For safety ensure that the printer is powered off.

- Lift the scanning unit until the scanning until support is vertical.

- Lower the scanning unit until the scanning unit support seats in the scanning unit support slot.

Step 2 — Step 2

- Locate the paper jam.

- Firmly grasp the end of the paper that is most accessible.

- Pull the jammed piece of paper from the printer evenly.

Step 3 — Inspect Printer

- Inspect the printer thoroughly to ensure that all pieces of paper have been removed.

Step 4 — Clean Paper Feed Rollers

- Scrub the paper feed roller using the detailing brush.
  - The roller can be rotated manually so the entire surface of the roller can be cleaned.

Step 5 — Restore Functionality

- Lift up the scanning unit and press the scanning unit support inward while lowering the scanning unit.

- The printer is now ready to print.
