## TOOLS:

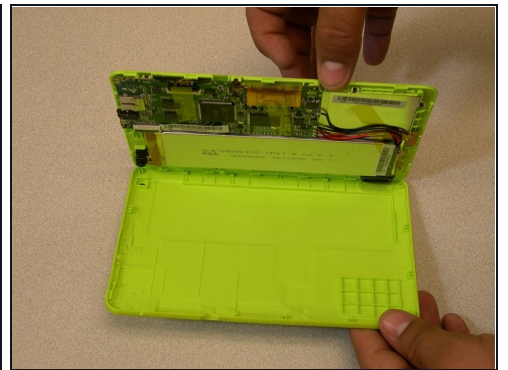

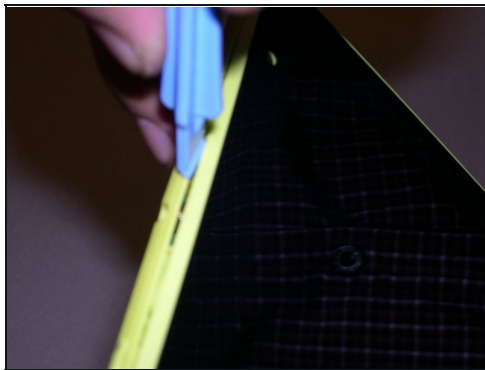

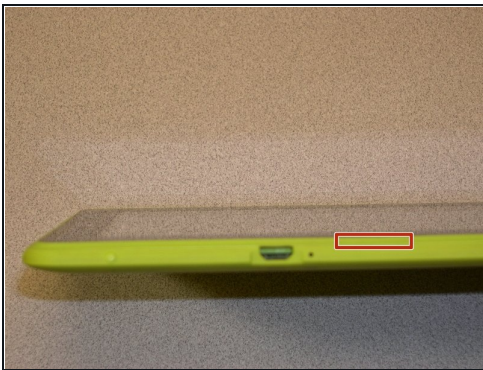

[iFixit Opening Tool](#) (1)

[Spudger](#) (1)

[Tweezers](#) (1)

---

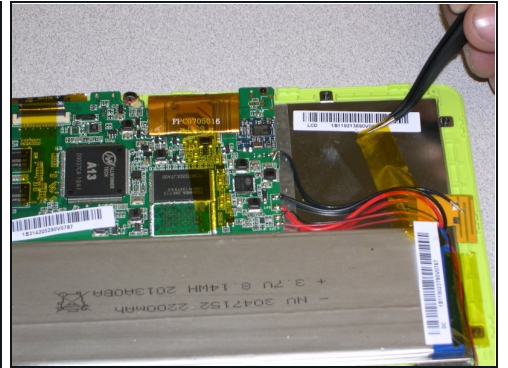

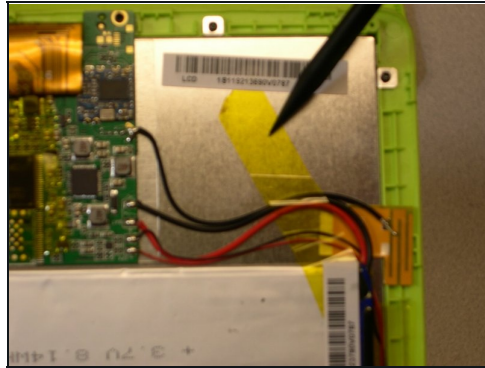

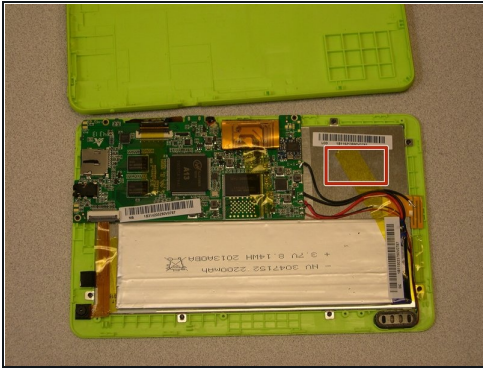

## Step 1 — Battery

- Insert the prying tool into the crack between the case and the display border found to the right of the charging port.
- Continue to pry around the case.
- After prying all around the device, separate the back cover from the display.

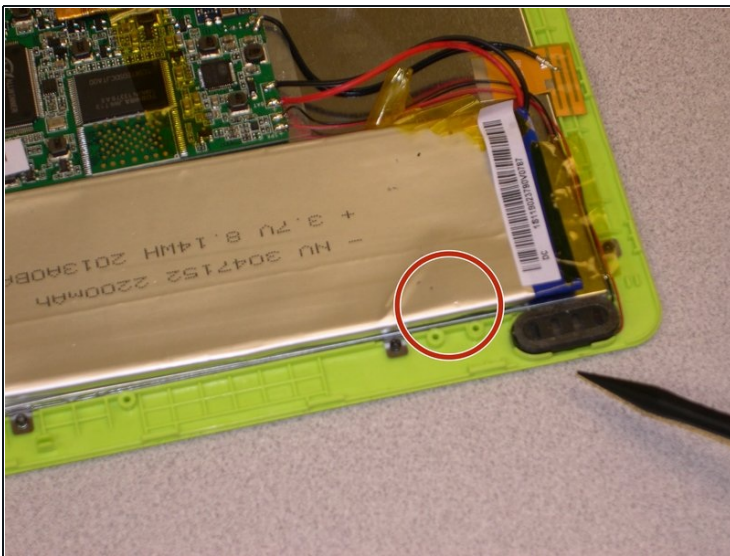

## Step 2

- Above the battery, peel back the yellow tape so the battery cables are not held in place.

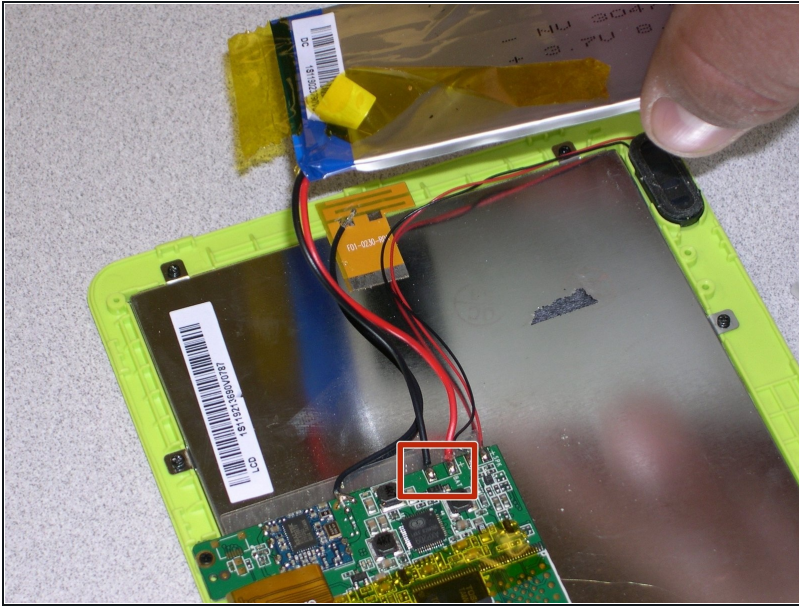

**i Do not completely remove the tape.**

## Step 3

- Use the spudger to pry underneath the battery and remove it.

## Step 4

- Use the [soldering iron](#) to remove the cables from the circuit board.
- Solder the new battery cables onto the circuit board.

To reassemble your device, follow these instructions in reverse order.
