🔧 TOOLS:

- iFixit Opening Tools (1)
- Phillips #00 Screwdriver (1)

Step 1 — Outer Case

- Unscrew and remove the four screws from the left side of the camera (from the screen's view)

Step 2

- Unscrew and remove the three screws from the bottom of the camera

Step 3

- Unscrew and remove the two screws from the right side of the camera.
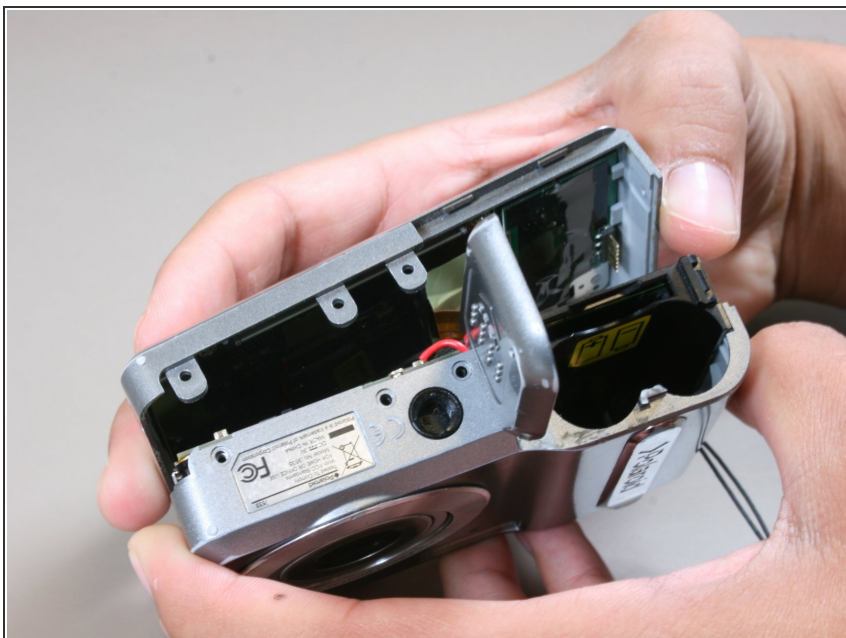

Step 4

- Open the battery flap and remove the batteries.
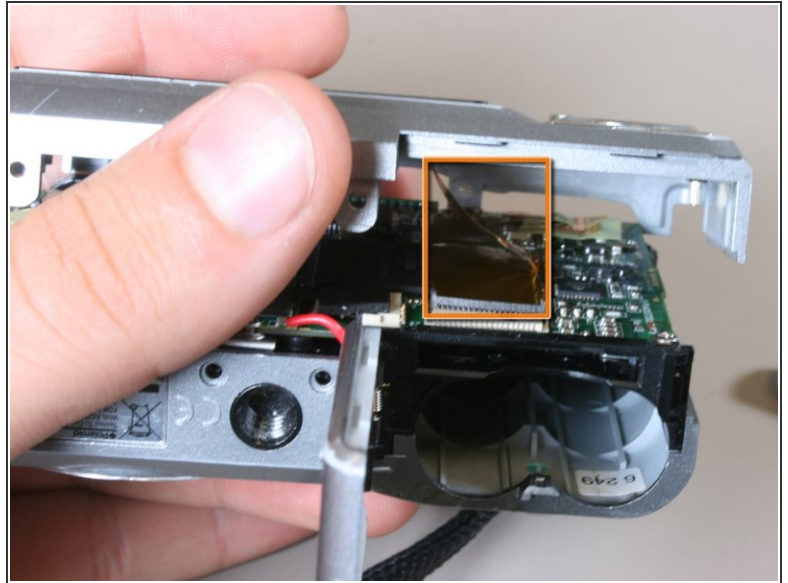

- Keep the battery flap open.

Step 5

- Use a spudger to gently separate the two halves of the camera's outer casing.

Step 6

- Gently pull the half of the case with the screen (the back half) from the rest of the camera.

- ⚠️ Be sure not too pull to hard. The screen is still attached to the motherboard. If you pull too hard you will rip it.

Step 7

- The back half (the half with the screen on it) should now be separate from the rest of the camera, but still attached by the ribbon.
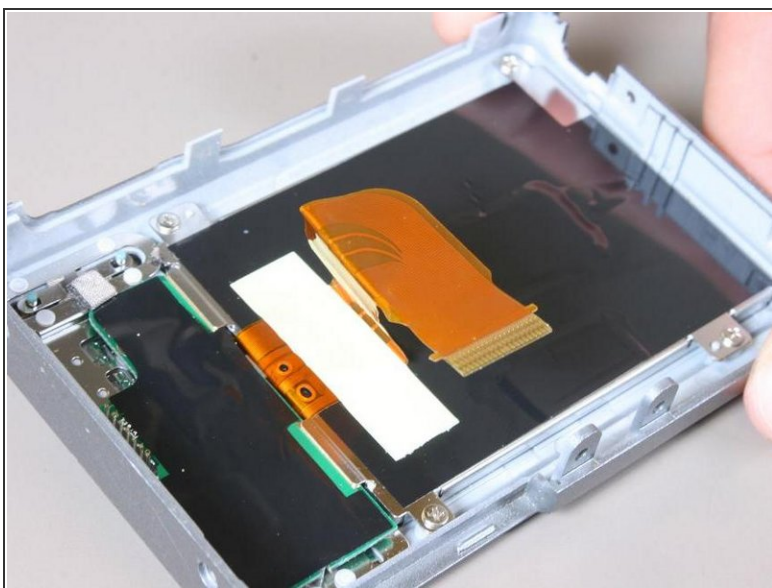

Step 8

- Use a spudger to lift the black flap that clamps the ribbon towards you.

- When the black flap is open it will be straight up. (like in the second picture)

Step 9

- Now that the black flap is open, gently pull the ribbon out.

- You should now have the back half of the camera completely separate from the rest of the camera.
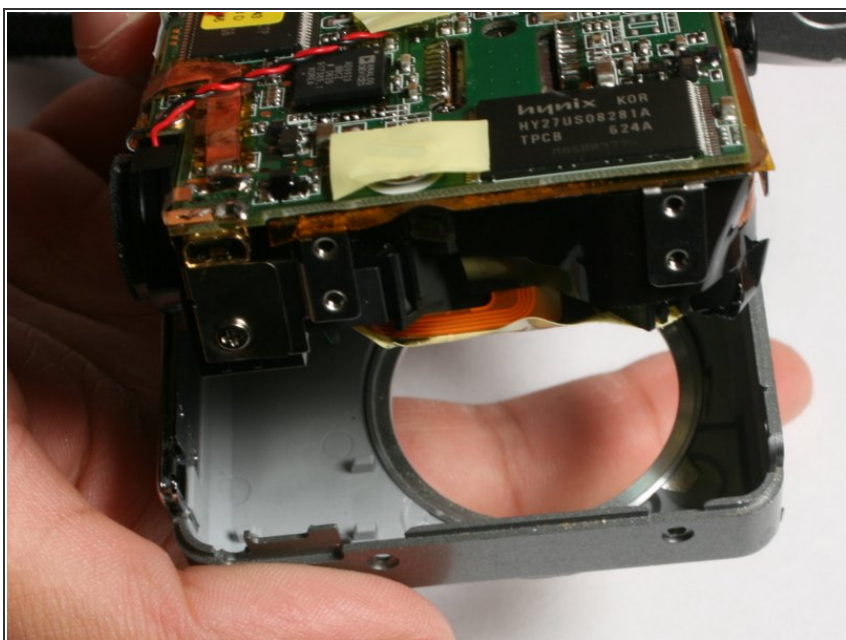

Step 10

- This is what the back half of the camera should look like.
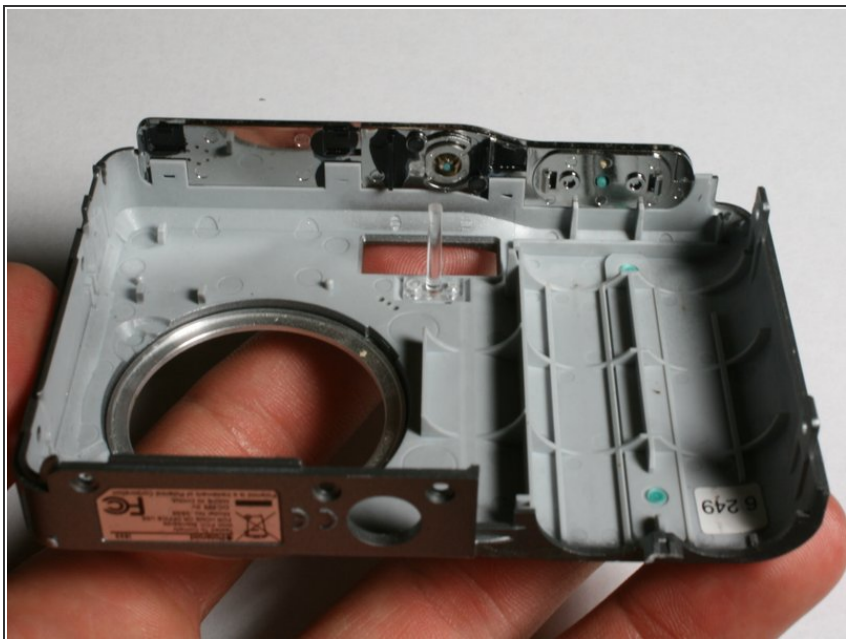

- This is what the rest of the camera will look like.
