Step 1 — LED

- Place the device face down on a flat surface, so that the screws on the back are facing the ceiling.
Step 2

- Using a screwdriver loosen the four screws connecting the body of the device together.
Step 3

- Once unscrewed, pop the back of the device off using the plastic opening tool.
Step 4

- Once unscrewed, take the back of the body and put it aside. We will be working with the front part of the device.
Step 5

- Using a screwdriver loosen the screws on the lights panel.

Step 6

- Using a plastic opening tool pop the light panel off. Be careful as to not rip any of the wires from the panel.

Step 7

- Carefully pull the LED lights off with a pair of tweezers. Once off, put in and connect a replacement.

To reassemble your device, follow these instructions in reverse order.
