

# Blade Removal Technique

This guide will show you several blade removing...

Written By: Kamal Taha

# INTRODUCTION

This guide will show you several blade removing techniques for when the blades are stuck somewhere on the motor of your Ninja Master Prep QB900B.

Be sure to have a tough cloth or a cut resistant glove on hand for the repair. In addition, make sure to turn off the device and unplug from the power outlet before beginning this repair.

---

## TOOLS:

Soft Cloth (1)

---

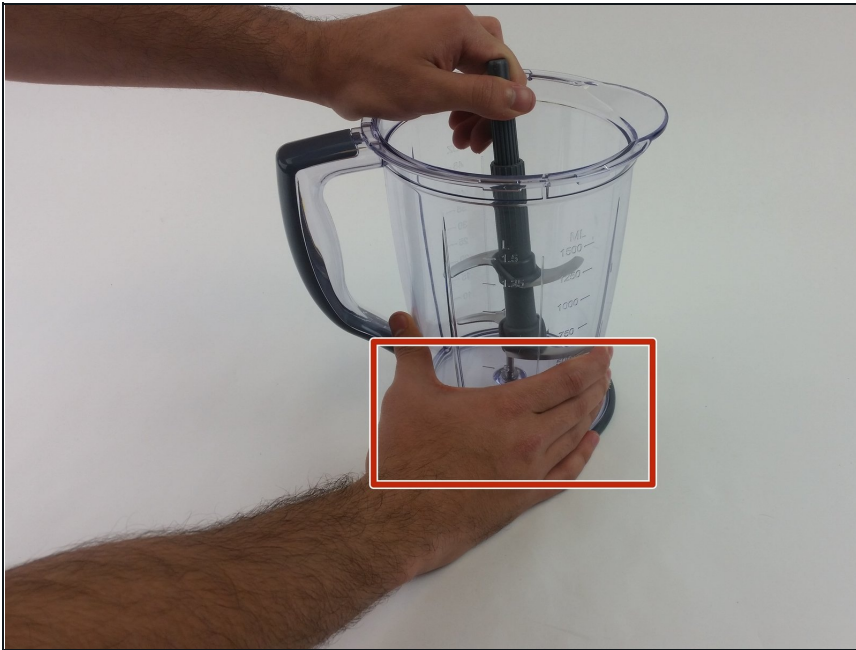

### Step 1 — Blade Removal Technique

- To remove the blades from each other, twist both blades in opposite directions and pull.

 Be cautious, the blades are sharp.

## Step 2

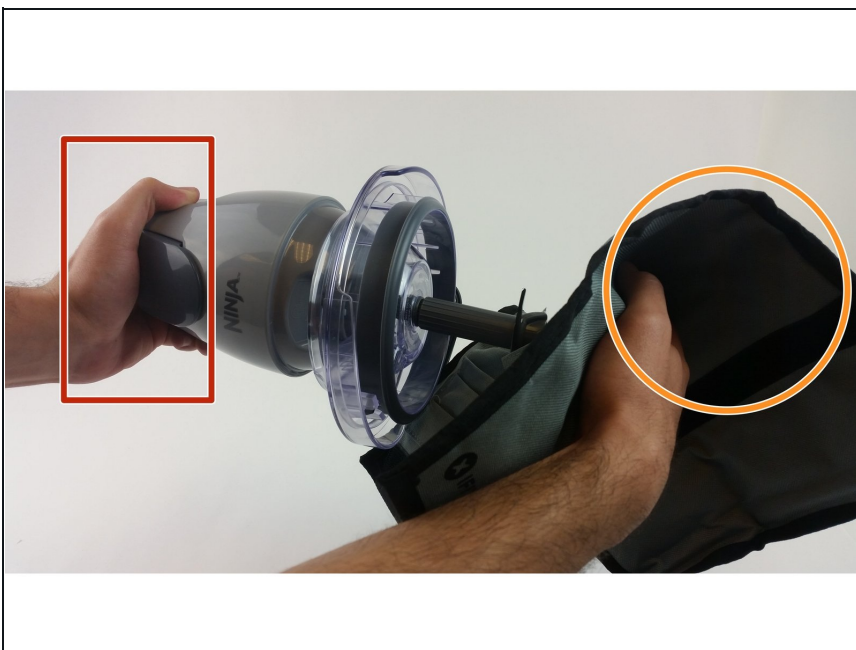

- To remove the blades from the cup. Firmly grasp the bottom of the cup.

**⚠ Be careful when you are doing this next step.**

- Pull upward as shown on the top of the blades.

## Step 3

- To remove the blades from the motor, firmly grasp the motor top.
- Next. Take a cloth or cut-resistant glove and grasp the blades.

**⚠ Be careful during this next step.**

- Now twist both ends in opposite directions to separate.
