INTRODUCTION

The screen replacement is fairly simple, however it does require some unscrewing and prying.

TOOLS:

- iFixit Opening Tools (1)
- Phillips #00 Screwdriver (1)
- Phillips #000 Screwdriver (1)

Step 1 — Battery

⚠ Before removing the battery, power off your laptop and disconnect the AC adapter.

● Flip your laptop on its back so the battery is facing up and the hinges are facing away from you.
Step 2

● Slide the right latch down to unlock the battery.

Step 3

- Slide and hold the left latch below the battery.

- While holding this latch in place, pry the battery up from its bottom edge.

- Lift the old battery out of its compartment.
Step 4 — Screen

- Remove rubber bumpers from each four corners to expose the hidden screws that hold the screen bezel in place.
Step 5

- Extract the hidden screws from each of the bezel's four corners, using a #00 Phillips screwdriver.
Step 6

- Pop the bezel loose along the edges with a plastic opening tool.
Step 7

- Gently pry off the bezel by holding each edge of the bezel with a forefinger and applying pressure onto the screen with your thumbs.

- Lift the bezel away completely.

Step 8

- Unscrew the middle screw on the green strip under the screen.

Step 9

- Gently detach the red-and-white cable from the right end of the green strip under the screen.

Step 10

- Locate six small screws, three on each side of the screen.

- Remove all six screws with a #000 Phillips screwdriver.

Step 11
- Disconnect wires from the webcam located above the screen.

This document was generated on 2020-11-15 02:45:16 AM (MST).

Step 12

- Lift the screen up from the laptop and turn it around.

- Gently peel back the tape located behind the screen.

Step 13

- Pull the connector straight down to remove it.

- You can now safely lift the screen out of the laptop.

To reassemble your device, follow these instructions in reverse order.
