INTRODUCTION

This guide will illustrate how to open the outer case of the Black and Decker PS1800.

TOOLS:

• Phillips #00 Screwdriver (1)

Step 1 — Open the Outer Drill Case

- Lay the drill on its side, assuring that the screw holes are facing upwards.
- Remove seven 12 mm screws using a Phillips #00 screwdriver.

Step 2

 Separate the outer drill case to expose the components and switch. To reassemble your device, follow these instructions in reverse order.
