TOOLS:

- iFixit Opening Tools (1)
- Phillips #1 Screwdriver (1)

This document was generated on 2020-11-15 01:42:38 AM (MST).

Step 1 — Battery

- Locate the external battery on the bottom side of the device.

- Locate the tab on the right side of the battery.

- Shift the tab to the left.

Step 2

- Locate the tab on the left side of the device's battery.

- Push the left tab to the right.

Step 3

- Pull the battery up from the device.

Step 4 — Back Plate

- Locate the 14, 3.93 mm, screws that need to be removed on the base of the computer.

Step 5

- Remove all 14 of the 3.93 mm screws using a PH1 screw bit.

Step 6

- Using two plastic opening tools remove the back plate.

- ⓘ These plastic opening tools have a flat-head that extends as a wedge which are utilized to separate pressure fit plastic components without causing any damage to them.

- The back plate is now removed exposing all of the hardware components.

Step 7 — WLAN Card

- Using a 3.93mm Phillips screwdriver remove the screw attaching the WLAN card.

Step 8

- Gently lift the WLAN card.

Step 9

- Gently using a plastic opening tool, remove the two latches attached to the WLAN card in the netbook.

- Your WLAN card is now removed.

To reassemble your device, follow these instructions in reverse order.
