This guide will help you locate and remove the RAM on the Asus G73JH-RBBX05.

Written By: Trevor Sprosty

INTRODUCTION

Use this guide to remove and replace the RAM on the Asus G73JH-RBBX05.

⚒ TOOLS:

- iFixit Opening Tools (1)
- Spudger (1)
- Phillips #0 Screwdriver (1)
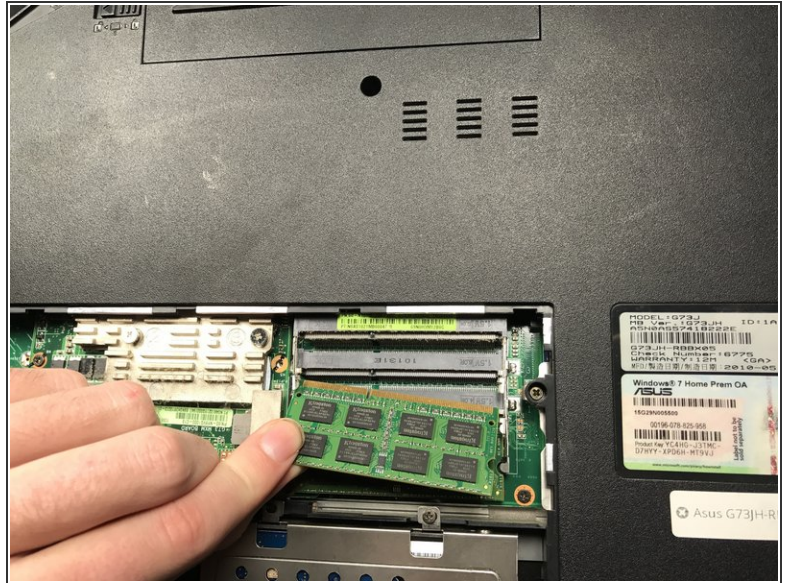

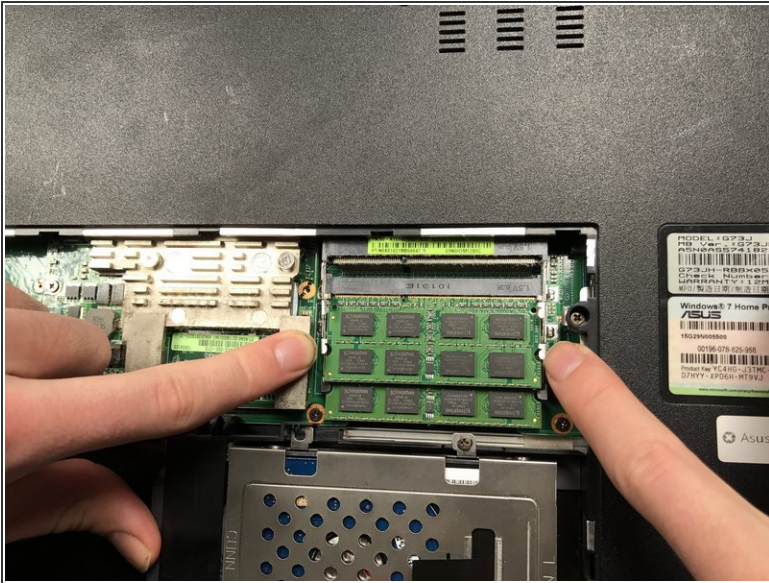

Step 1 — RAM

- Locate the two, 4mm screws on the back of the laptop and remove them using a PH0 screwdriver.

Step 2

- Use the plastic spudger to remove the panel.

Step 3

- Push down the metal clips and remove the RAM.

To reassemble your device, follow these instructions in reverse order.
