

Nexus S Front Panel Assembly Replacement

Replace the front panel assembly in your Nexus S.

Written By: Walter Galan

INTRODUCTION

Use this guide to replace the front panel assembly.

TOOLS:

- Phillips #00 Screwdriver (1)
- iFixit Opening Tools (1)

Step 1 — Rear Panel

- Gently insert a plastic opening tool between the rear panel and the inner rear frame near the rear-facing camera.
- Use your plastic opening tool to pry up the rear case around the perimeter of the Nexus S.

Step 2

 Remove the rear panel from the Nexus S.

Step 3 — Battery

- Using the edge of a plastic opening tool, lift the battery from the end closest to the headphone jack.
- Remove the battery from the Nexus S.

Step 4 — SIM Card

- Use your thumb to slide the SIM card downwards from the SIM card slot.
- Remove the SIM card.

Step 5 — Rear Inner Frame

 Remove the six Phillips screws securing the rear inner frame to the inner case.

Step 6

- Insert the flat edge of a plastic opening tool in between the rear inner frame and the top left corner of the Nexus S.
- Pry the opening tool upwards to pop the top right corner from the clips securing it to the inner assembly.

Step 7

- Insert the plastic opening tool to the right of the power button.
- Slide the plastic opening tool downwards along the perimeter of the Nexus S to release the clips on the right side.

Step 8

• In the same manner as previously described, release the bottom clips located near the bottom of the Nexus S.

Step 9

 Insert and pry the plastic opening tool to release the final clip securing the rear inner frame to the inner assembly.

Step 10

 Lift and remove the rear inner frame from the Nexus S.

Step 11 — Motherboard

- Disconnect the following cables from their respective sockets on the motherboard:
 - Headphone jack cable
 - Digitizer cable connector
 - Camera/SIM board connector

Step 12

- Insert the flat edge of a plastic opening tool underneath the headphone jack connector and pry upwards.
- Make sure to pry on the connector and not the socket itself. Prying the socket may cause severe damage.
- Repeat the procedure for the digitizer and rear camera/SIM board connectors.

Step 13

 Remove the three Phillips screws securing the motherboard to the front display assembly.

Step 14

- Wedge the plastic opening tool near the bottom right corner of the motherboard and pry upwards to dislodge it from its recess.
- Lift and remove the motherboard.

Step 15 — Front Panel Assembly

Front panel assembly remains.

To reassemble your device, follow these instructions in reverse order.
